Aseptix® Moisturizing Hand Disinfectant is a unique and patented, skin friendly disinfecting hand rub containing 40% less alcohol than generally used in alcohol-based hand disinfectants, while it still reaches broad spectrum disinfection with short contact times. The product is easy to apply, and no water is needed in use: just rub to dry.

No harsh chemicals
Aseptix® Moisturizing Hand Disinfectant does not contain Triclosan, Quats, chlorhexidine or phenolic compounds. It attacks germs via an effective two stage, synergistic disinfection process. The low alcohol percentage avoids drying of the skin. Aseptix® Moisturizing Hand Disinfectant also contains novel skin moisturizers, dramatically improving the skin after feel. Aseptix® Moisturizing Hand Disinfectant is specifically designed for skin disinfection applications in which high efficacy and rapid disinfection capacity, but also good skin compatibility and skin feel, are required. All products of Aseptix are extremely safe, user-friendly, fully biodegradable and can be readily disposed of.

Aseptix® Moisturizing Hand Disinfectant is a perfect hand disinfectant to carry with you at any time and in any environment. Especially convenient when travelling, but also in offices, schools, factories, (para-) medical applications et cetera. Provides extra security in pandemic times.

Aseptix® MOISTURIZING HAND DISINFECTANT

Features
- Broad spectrum disinfection, exceeds efficacy standards.
- Provides a well cared after feel, does not dry the skin.
- Available as easy to carry 50 ml spray bottle.
- Features synergistic disinfection compounds.
- Worker and consumer safe.
- Moisturizing composition.
- Well cared after feel.

40% less alcohol, 100% compliance
Aseptix® Moisturizing Hand Disinfectant is a unique and patented, skin friendly disinfecting hand rub containing 40% less alcohol than generally used in alcohol-based hand disinfectants, while it still reaches broad spectrum disinfection with short contact times. The product is easy to apply, and no water is needed in use: just rub to dry.

No harsh chemicals

Suggested use
Aseptix® Moisturizing Hand Disinfectant is a perfect hand disinfectant to carry with you at any time and in any environment. Especially convenient when travelling, but also in offices, schools, factories, (para-) medical applications et cetera. Provides extra security in pandemic times.
EFFICACY

> Bactericidal:
  EN 1040 & EN 1276 < 30 sec.*
  (including a.o. MRSA and Clostridium difficile cells (< 15 sec.))

> Yeasticidal & Fungicidal:
  EN 1275, EN 1650*
  (C. Albicans 2 min, A. niger 5 min).

> Virucidal:
  Tested according the Guidelines of the German DVV/RKI < 15 sec.
  (HIV, HBV, HCV, Influenza, H5N1 (Avian Flu), H1N1 (Mexican Flu), SARS, (model Vaccinia & BVDV).
  Noro < 60 sec following the EN 14476 procedure.

> Hygienic Hand Rub Test:
  EN 1500 < 60 sec. (2 applications).

  * clean & dirty conditions

SKIN COMPATIBILITY

Aseptix® Moisturizing Hand Disinfectant has been tested for skin compatibility at Derma-Consult in Alfter, Germany. The product was especially developed for people with sensitive skin, and for people who disinfect their hands often.

The tests indicated the products to cause absolutely no irritation and high skin compatibility. The full report is available upon request.

MICROBIOLOGICAL EFFICACY

Aseptix® Moisturizing Hand Disinfectant has been tested by independent laboratories according the European Norms EN 1040, EN 1276, EN 1275, EN 1650 (Quantitative suspension test for the evaluation of bactericidal respectively fungicidal activity of chemical disinfectants and antiseptics used in food, industrial, domestic, and institutional areas) and exceeds these European norms for disinfection. It is also effective against HIV, SARS, Avian Influenza and Hepatitis B and C viruses. Independent laboratory test data on the antimicrobial efficacy are available on request.

Aseptix® Moisturizing Hand Disinfectant passes the EN 1500 norm (Hygienic Hand Rub) within 60 seconds (2 applications). This enables Aseptix® Moisturizing Hand Disinfectant to be used also in critical environments such as healthcare, nursing, hospitals, and HACCP controlled food processing environments.
